

TEST WELLS WITH NOJAK

When you need to test a well to determine its capacity for production, you need NOJAK Pumping Solutions. Whether the well has an existing pumping system or not, it still makes sense to install NOJAK if you want to quickly and economically turn a questionable well into a producer.

ECONOMICAL, LESS LABOR-INTENSIVE TESTING

The NOJAK Pumping System is affordably priced according to time of usage per well and is less labor-intensive than older technology systems, making it the perfect solution for well testing.

AVAILABLE FOR DAYS, WEEKS, OR MONTHS, AS NEEDED FOR TESTING

NOJAK works with you on an “as-needed” basis as you test your wells, giving you a cost-effective way to test several wells at once.

FAST AND EASY INSTALLATION FOR QUICKER RESULTS

The NOJAK Pumping System can be installed in the morning and fully operational in the afternoon if the well is already open and there is no older equipment to remove.

PORTABLE EQUIPMENT, NO ELECTRICITY NEEDED

The NOJAK Pumping System is easily moved from one test well to another, with tanks included at your request.

DISCOUNTS AVAILABLE AFTER TESTING

NOJAK will discount the entire pumping system when you leave it in the well and purchase it after testing.

Take advantage of this tremendous opportunity to test your wells and at the same time, test the performance of NOJAK Pumping Systems.
